

CLINICAL RESEARCH PLATFORM (IC-HCL)

Better together

Partners of the IC-HCL platform

- All cancer related medical and non-medical experts in oncology from large university hospitals
 - Medical and surgical departments
 - Biology, genetics, pathology, radiology
 - Pharmacy
 - Certified expert centers for management of rare cancers
- www.chu-lyon.fr/fr/cancers-rares**
- DRCI
 - Clinical research teams dedicated to cancer
 - Experts of the HCL

Clinical research teams dedicated to cancer

- IC-HCL Clinical Research Platform
- Early phase trial center « CITOHL » certified by the French NCI INCa
- CRC Cancer (Financial support and training)
- URCOT (Thoracic oncology)
- Clinical department investigators and CRAs

Applications

- All tumor types
- Multidisciplinary projects

Over 450 clinical trials in cancer /year

Approximately 3600 patients included/year

HCL and Cancer

With 14,000 patients, including 8,500 new cases each year, the University Hospital of Lyon “Hospices Civils de Lyon” (HCL) is **one of the major cancer centers in the Rhône-Alpes region** (www.chu-lyon.fr/fr). Affiliated to the University Claude Bernard Lyon 1, the HCL is **actively involved in academic research, medical training and university teaching**, along with management of patients with **all types of cancers in 12 hospitals** located in the Lyon area. Moreover, an international expertise has been developed in **rare tumor diseases and oncogeriatry**.

IC-HCL

Founded in 2014, the HCL Cancer Institute “Institut de Cancérologie des Hospices Civils de Lyon “IC-HCL” is **a network within the institution**, with the following objectives :

- to improve patient managements and therapeutic strategies in the HCL and Rhône-Alpes region,
- to face the demographic and scientific challenges of the upcoming years,
- to promote the access of patients to diagnostic and therapeutic innovations.

IC-HCL Clinical Research Platform

In 2015, a platform dedicated to coordinating and integrating the multiple cancer-related research activities of the HCL was created, namely the IC-HCL Clinical Research Platform. The tasks assigned to this platform include:

- Help and support for research and clinical trials: letters of intent, project design, funding, trial implementation, study coordination and nurses, dedicated resources, communication... with the objective of increasing multi-disciplinary cancer research and innovation within all teams of the HCL.
- A unique and integrated contact for academic and industrial partners willing to cooperate with the HCL in the context of cancer care management or research projects.

Expertise of the IC-HCL Clinical Research Platform

- Connection of industrial and academic partners to the adequate HCL specialists
- Help and support for grant applications, project design and writing
- Multisite study and trial implementation
- Help and advice for meeting the needs of study managers
- GCP training

Mention us in your publications!

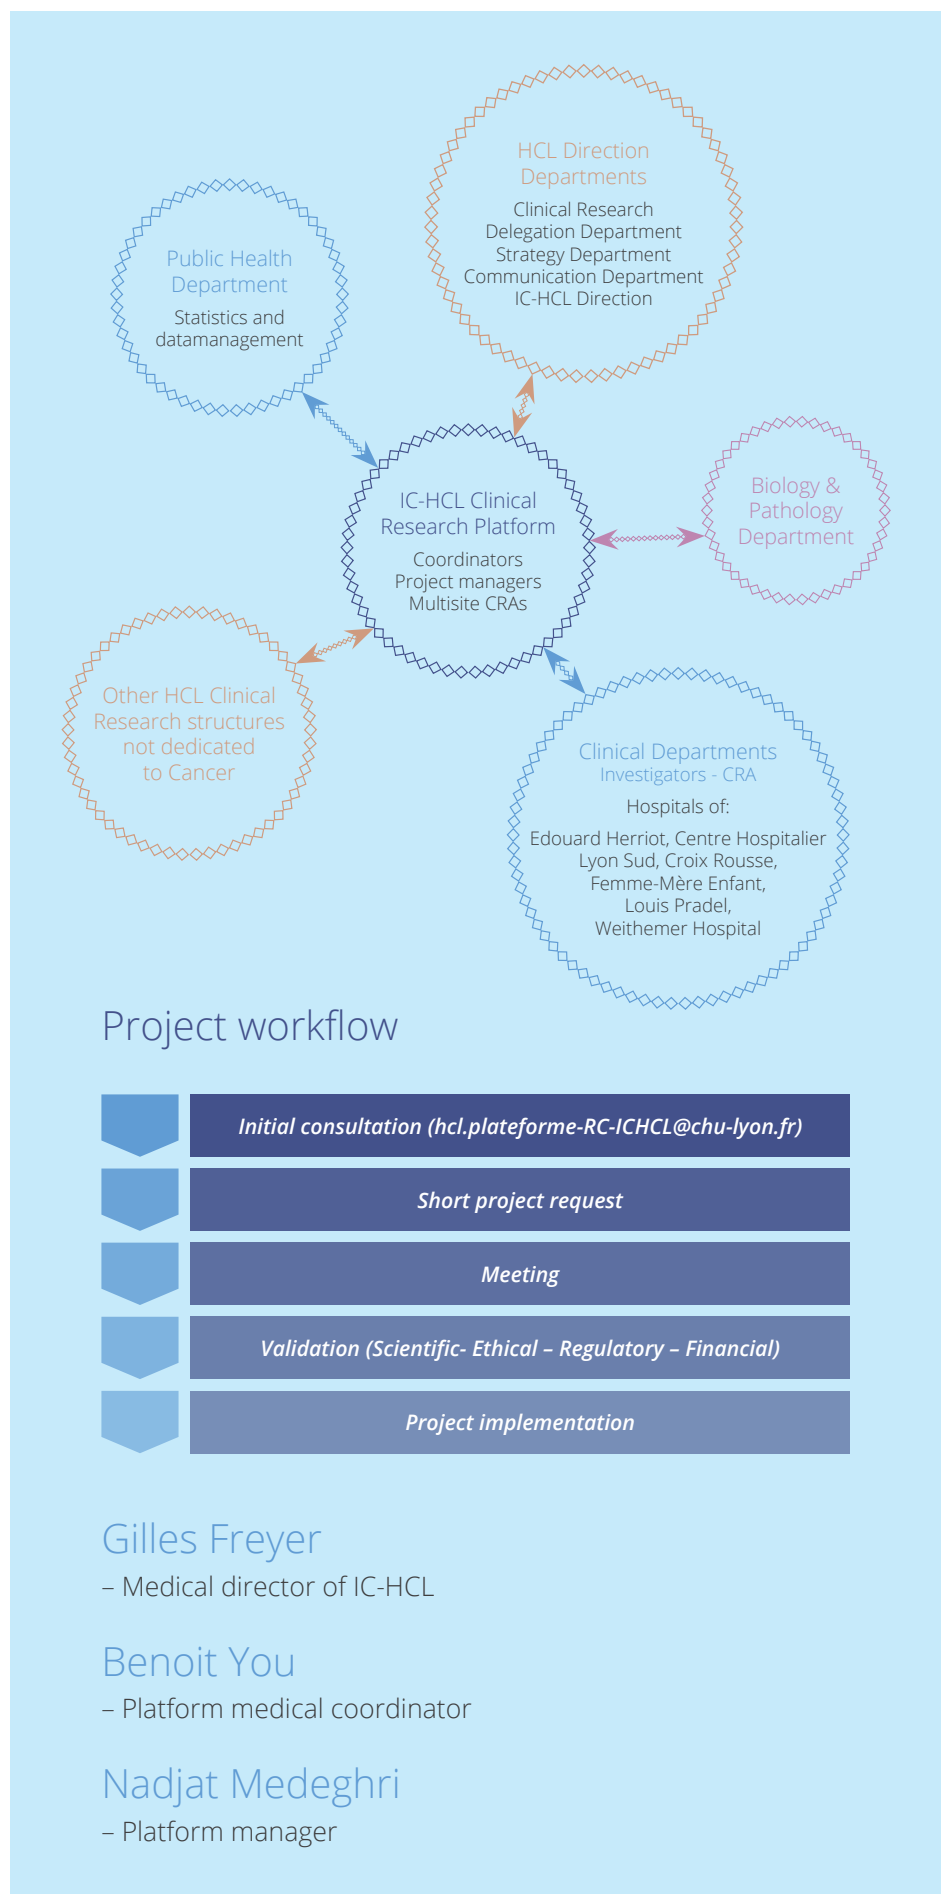

To allow our platform to pursue its objectives, we need you to mention our work in your publications as follows:

Plateforme de Recherche Clinique de l'Institut de Cancérologie des Hospices Civils de Lyon IC-HCL

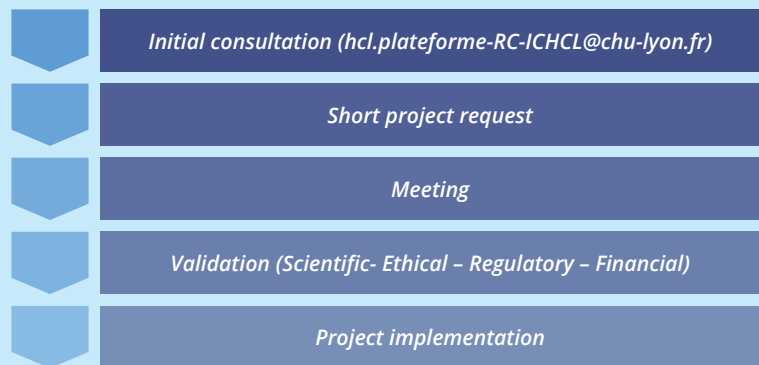

Contacts

hcl.plateforme-RC-ICHCL@chu-lyon.fr

Project workflow

Gilles Freyer

– Medical director of IC-HCL

Benoit You

– Platform medical coordinator

Nadjat Medeghri

– Platform manager
